01 THE GROUP

One group for the work ahead.

Mendozer Investments CC has operated in Namibia since 2009, registered under CC/2009/2399. The group is led by Managing Director Johannes Negumbo, and brings six working directions into one accountable line for partners, institutions and commercial enquiries.

Construction, technology, cooling, logistics, energy and tourism are connected by one operational backbone. Start with the sector closest to the work in front of you, and bring the group in when the brief crosses disciplines. Every direction carries the same standard: real site context, verified records, and work delivered with care.

*"Six working directions.
One accountable group."*

02 LEADERSHIP

A clear line of accountability.

Johannes Negumbo is the Managing Director of Mendozer Investments CC, the accountable line for group enquiries across all six working directions.

A broad group view means each sector can be understood in relation to the people, systems, sites, and logistics around it. The group is introduced through local working context, not a generic imported template.

03 CONSTRUCTION & TECHNOLOGY

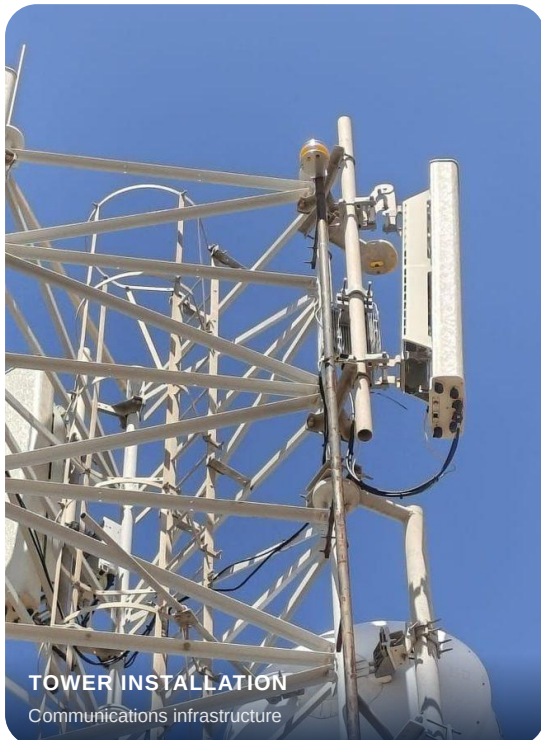

01 —

Construction & Infrastructure

Civil and building work on open sites: access, structures, and the coordination of crews on the ground. Every project follows the same standard the group applies across all six directions: real site context, verified records, and work delivered with care.

- Site access and civil works, planned before the first truck arrives
- Structural coordination that keeps multiple crews moving without clashing
- On-the-ground crew management, so work doesn't stall waiting on a decision

02 —

Technology & Systems

Field systems and telecom infrastructure, including tower installation and the equipment that keeps teams linked. Work spans prepared sites through to full commissioning of communications infrastructure.

- Communications tower installation, built for Namibia's terrain
- Field systems infrastructure that keeps remote sites connected
- Equipment supported end-to-end, from install through to commissioning

04 COOLING & LOGISTICS

FACILITY INFRASTRUCTURE VISIT
 Plant and piping systems

FIELD CREW ON ROUTE
 Site logistics support team

03 —

Cooling & Cold Chain

Facility work around plant rooms, piping, and the controlled conditions that keep operations continuous. The group supports the infrastructure that keeps cold chain and facility systems running without interruption.

- Plant room and piping infrastructure built for continuous operation
- Controlled-condition facility work that protects what's inside
- Cold chain continuity, so quality holds from start to finish

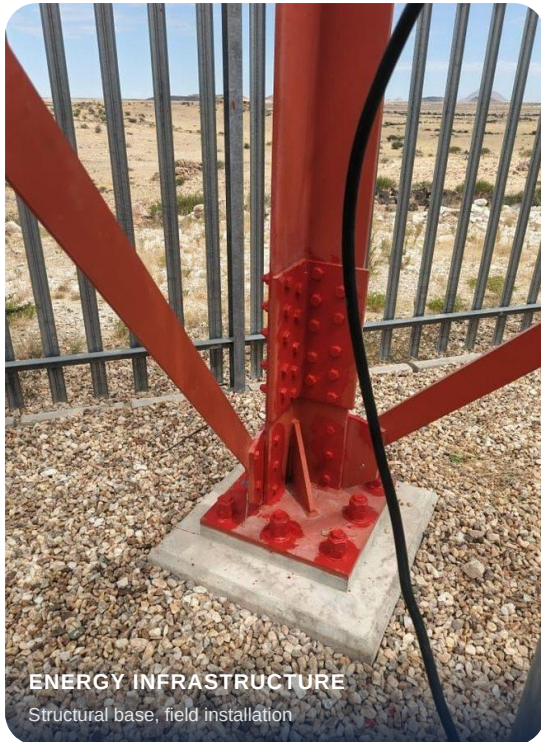

04 —

Logistics & Support Services

Moving people, materials, and support through active sites and changing work routes. Logistics support connects every other working direction, keeping crews, equipment and supplies where they are needed.

- Movement of people and materials, coordinated to the day's plan
- Support across active work routes, even as conditions change
- One point of coordination linking every other sector

05 ENERGY & TOURISM

ENERGY INFRASTRUCTURE
Structural base, field installation

05 —

Fuel & Energy Distribution

Wholesale fuel distribution under licence W/188/2017, with supporting plant and infrastructure. Mendozer Investments CC is listed as a wholesale distributor in the Namibia Government Gazette.

- Wholesale fuel distribution under licence W/188/2017
- Supporting plant infrastructure built for reliable supply
- A licence and listing any partner can verify directly

NAMIBIAN LANDSCAPE
Rural roadside setting

06 —

Tourism & Agriculture

Land, access, and rural operating settings across the Namibian landscape. This direction connects the group's work to the land itself, from access routes to agricultural and tourism-ready sites.

- Land and access route development that opens land up for use
- Rural operating environments, worked with local knowledge
- Agricultural and tourism-ready sites, prepared for what's next

06 HOW THE GROUP WORKS

A clear framework for a wider portfolio.

A broad group view means each sector can be understood in relation to the people, systems, sites, and logistics around it.

01

Start in one place

One direct route for enquiries that need more than one capability. Bring the full scope of the work into a single conversation with the group.

02

Choose the closest fit

Begin with the sector that matches the immediate work, then widen the conversation where needed. Choose Group enquiry when the scope crosses disciplines.

03

Built for Namibia

The group is introduced through local working context, not a generic imported template: real site context, verified records, and work delivered with care.

What to include in an enquiry.

- A short description of the work or opportunity.
- The relevant sector, or Group enquiry if it crosses more than one.
- Any useful site or operating context.
- The best person to contact.
